

Fruit Dinos

“Sherman and I recreated some dinosaurs we saw on our last WABAC trip... out of fruit! This is what we came up with. Show us your variations using all sorts of fruit!” – Mr. Peabody

Servings: 15 -20
 Prep Time: 30 minutes

Ingredients

- 1 watermelon
- 4 clusters of grapes
- 1 strawberry
- Toothpicks

Directions

- To make the big dinosaur head, have an adult use a sharp knife to carefully cut a thin slice off the long side of the watermelon to create a flat base that holds the dinosaur’s head in place, then cut a wedge of the watermelon to create the mouth of the dinosaur
- Insert grape clusters into the dinosaurs mouth and stick toothpicks into the watermelon along the sides to create the dinosaur’s teeth
- Use a fruit baller to carve out the dinosaur’s eyes and place a grape inside for the pupils
- Use spare watermelon rind to create eyebrows and nostrils
- To make Sherman’s mini dinosaur, take a watermelon wedge and cut small triangles down the spine
- Insert a toothpick in the watermelon for each arm and leg
- Insert grapes through the toothpicks to create the arms and legs
- Use a toothpick to attach a strawberry as the dinosaur’s head
