INSTRUCTIONS

Print out the Star Trek Prodigy characters on printable shrink plastic. The provided printable is ready to bake and has been adjusted with the brightness increased by 50%, which is done to ensure the colors are more accurate after shrinking.

Cut out printed characters before baking, as they will be too difficult and thick to cut out afterward. To turn these into charms or keychains, poke hole in plastic before baking as well. Place characters on baking sheet and bake according to package directions, usually for around two to three minutes at 350 degrees.

If characters do not come out of oven flat, place another baking sheet on top of them and press down while they are still warm to flatten edges.
