

FOLLOW THE PATH

CAN YOU LEAD PATCHI AND JUNIPER OUT OF DANGER?

In *Walking With Dinosaurs: The 3D Movie*, the young Patchi and his friend Juniper get separated from Patchi's mum and their herd of Pachyrhinosaurus. Pachyrhinosaurus stick together in herds for safety and survival, and it's especially dangerous for young dinosaurs to be on their own.

Try and lead Patchi from 'START' all the way back to Patchi's mum by finding a route through the maze of rocks and dinosaurs.
