

Instructions :

1. Print out all of the pages of the Fourth of July streamers on white card stock. You can print out the pages as many times as you like to get your desired number of stars and fireworks rockets.
2. Fold each sheet of paper along the dashed gray line and cut out each element. Be sure to leave the stars and fireworks rockets attached at the dashed line.
3. Cut a piece of fishing line, ribbon, sting, or twine as long as you would like your streamers/mobile to be. Remember to leave some room at the top and bottom so you can tie your mobile to the object it will hang from.
4. Tape the top end of your string or ribbon to a flat working surface to hold it steady. Next, pick out your first element and open it so that the blank side of the element is facing up. Lay the string or ribbon directly in the middle (see diagram below) of the element. Tape the string or ribbon to the center then cover it in glue. Fold the other half of the star or rocket over and press down firmly to ensure that it sticks to the string or ribbon.
5. Repeat Step 4 with as many of the elements as you desire, going down the line. You can put them in any order.
6. When you finish, cut the sting or ribbon at the bottom of the last heart and hang your Fourth of July streamers mobile(s) anywhere you like. Experiment and have fun creating!
