

Reminder

Only a grown-up should use the scissors and cutting knife.

What You'll Need

- 8 1/2" x 11" cardstock (we recommend 110-pound paper for best results)
- Scissors
- Cutting knife
- Tape
- Glue

How To Make it

1. Print the following pages and have a grown-up cut out the picture frame and frame stands.
2. Have a grown-up use a cutting knife to cut out the gray area in the middle of the picture frame.
3. Place a 4"x6" photo in the opening and tape it to the back of the picture frame.
4. To assemble each frame stand, glue the backsides of the yellow sections together. Fold the B tabs outward and glue them to the back of the picture frame.
5. Once you've assembled both frame stands, affix both to the back of the picture frame, one on each end for optimum support.
