

Disney **KIM POSSIBLE**

DIY PENDANT NECKLACE

MATERIALS

- Black felt
- Mod Podge
- Paintbrush
- Black rattail cord
- Velcro fasteners, self-adhesive
- Pendant, 1 inch circle
- Necklace template
- KP logo template
- 1 inch circle punch
- Scissors
- White pencil
- Glue gun
- String
- Ruler

INSTRUCTIONS

- Print out the necklace template and the KP logo template.
- Using the 1 inch circle paper punch, punch out the KP logo circle.
- Center the KP logo in the middle of your pendant and apply a light coating of Mod Podge. Let dry flat for 15 to 20 minutes and apply a second thin coat. Lay flat for a few hours before assembling this piece of the craft.
- While the pendant is drying, cut out the necklace templates.
- Take a piece of string and loosely measure around the neck of the child you are making this craft with. Cut the string to the length you measured plus 1 inch longer (this is where you will add your fastener) and set aside.
- Lay the black felt on a firm surface and lay the string along one edge of the felt. Lay the template along the same edge; lay the second template after it. Trim the template to the same length as the string.
- Use the ruler to trace along the edge of the template with a white pencil.
- Cut out the necklace from the piece you just measured and drew. Double check that you cut the correct length.
- Adhere the Velcro fasteners to the ends of the necklace felt.
- Cut a piece of rattail cord about 2 inches long (just long enough that you can tie to the pendant once it has finished drying) and then glue the ends to the center of the bottom back necklace.
