

MARVEL STUDIOS CAPTAIN MARVEL PAPER GLIDER

INSTRUCTIONS

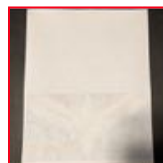

1. Print out the Captain Marvel Paper Glider Template.
2. Turn paper over to the unprinted side.
3. Fold paper down from top right corner to left side so right side of paper forms a right angle to left side of paper.
4. Fold top left corner of paper down to the right side of paper forming a little house with a pointed roof.
5. Fold the paper in half lengthwise. Make a nice crisp fold.
6. Unfold paper and then fold the top point down until it touches the previous fold. This gives the glider a blunt nose.
7. Fold paper back in half again.
8. Fold down wings. About a 1/2 inch to an inch up from the center crease fold the paper down to form two wings. This will be the part you will hold to throw the glider.
9. Outer Tips of Wings: Fold outer wings up about 1/4 of an inch.
10. Optional Step: You may opt to put a paperclip on the nose of the glider to keep it together and give it some extra weight and keep the body together tighter. A bit of tape does the trick as well.
