

# WATCH BLU FLY

(SORT OF)

Even though Blu is a bird, he never learned how to fly. With Rafael's help, make him and Jewel take to the skies by building this glider.

## RAFAEL'S FOLDING INSTRUCTIONS

**1.** Fold the square piece of paper along the two diagonals on figure 1, creasing well on both lines and opening out the paper again afterwards. **2.** Now fold along the dotted line in figure 2 bringing the left hand edge to the diagonal center line from top right to bottom left. This will give you figure 3. **3.** Now fold along the dotted line in figure 3 to give you figure 4. **4.** Fold the tip down on the existing crease as shown by the arrow in figure 4. **5.** Now fold the blunt nose over again along the dotted line in figure 5. **6.** Now fold along the center line on figure 6 to give figure 7. **7.** Now fold the wings down along the dotted lines in figure 7 to give the complete glider.
