

Create Your Own DIORAMA

Step One: Create a Base

The diorama base can be made from anything that has a flat surface like a shoebox, a paper plate, or Kleenex box.

Step Two: Set the Scene

Create a backdrop for your diorama and have it be as creative or as simple as you want! Use paper that you can color, print the attached background images, or cut pieces of colored paper and glue them to the surface that will be your background.

Step Three: Make your World Come Alive

- Use coloring pages or stickers printed from www.epicthemovie.com/toolkit to make figures for your diorama and print them out.
- Cut out your images and be sure to leave a tab (3/4" to 1") below the characters so that they can be folded back and attached to the base of your diorama.
- If you want to create a cool flying scene by hanging a figure from the top of the diorama, add a one inch tab to the top. You can also use string, yarn, or ribbon to hang the objects from the top of the box so they will swing.
- You can also use your own action figures, legos, or toys to create your scene. Just make sure it's ok to glue things before you do it!
