# Are You Afraid of the Dark?

CURSE OF  
THE SHADOWS

# POTATO ELECTRICITY ACTIVITY

AVAILABLE ON  
AUGUST 10<sup>TH</sup>

## SUPPLIES

- 3 fresh medium-size potatoes
- Copper electrodes/strips (or pennies), one per potato
- Zinc electrode/strips (or galvanized nails), one per potato
- Small LED light or LCD clock with wires
- Insulated wires (at least 4), with metal or alligator clips at the ends

## DIRECTIONS

1. Insert one copper strip and one zinc strip into each potato.
2. Use one alligator clip with wire to connect copper strip in potato to positive terminal on clock/LED light.
3. Attach another wire to the zinc strip in that potato to the copper strip in the next potato.
4. From the 2nd potato, use another wire to connect zinc strip in that potato to copper strip in 3rd potato.
5. In the 3rd potato, use one alligator clip with wire to connect zinc strip in that potato to negative terminal on clock/LED light.
6. Voila - watch the clock or light turn on!
