

DIY BABY SHARK BATH BOMBS

SUPPLIES

- 2 cups baking soda • 1 cup corn starch • 1 cup citric acid
- 1 cup Epsom salts • 2 tbsp. coconut oil (in liquid form) • 4 tsp. water
- Mica powder (yellow, pink, blue) • Bath bomb molds, small and medium sizes

INSTRUCTIONS

1. Combine the baking soda, corn starch and Epsom salts in a large bowl and blend together with a whisk. (Note - do not add the citric acid.)
2. In a small glass, combine and stir the liquid coconut oil and water.
3. Pour liquid mixture into the dry ingredients. Mix well, breaking up any clumps.
4. Lastly, add the citric acid to the mixture. Mix well until the combined ingredients resemble damp sand.
5. Reserve half of the mixture in the original bowl for the white bottom half of each character. With the remaining half of the mixture, divide it between three separate bowls and color one yellow, pink and blue.

DIY BABY SHARK BATH BOMBS

INSTRUCTIONS (Continued)

6. For Baby Shark, fill half of a small mold with the yellow mixture and pack firmly. Fill the second half of the small mold with the white mixture and pack firmly. Next, combine both halves of the mold to form a sphere, holding the pieces in place for a few moments.
7. While still holding the pieces tightly together, gently shake the mold to loosen the mixture. Carefully remove each half of the mold and place the bath bomb sphere on a piece of parchment paper to dry.
8. Repeat the process with a medium mold for both the blue and pink mixture for Daddy Shark and Mommy Shark.
9. Let the bath bomb spheres dry overnight or until completely firm.
10. Print the Baby Shark holder templates and cut them out. Form a ring and tape the ends together with tape. Place the corresponding bath bomb inside its character.
11. When it's time to use the bath bomb, add it to warm water and watch it dissolve!

Note: If the bath bomb mixture is too dry to properly hold the shape of a sphere when you remove it from the mold, add the mixture back to the corresponding bowls and add an additional tsp. of coconut oil to the mixture.
